The most beautiful fabric between heaven and earth.

Awning Fabric Collection – Made in Germany

**Printed is not woven!**

Before making a final choice of pattern, please be sure to compare the illustration in this fabric brochure with an actual fabric sample in the showroom of your local markilux specialist dealer. Depending on the model, awning size and pattern, the awning cover will either be seamless or with transverse or longitudinal seams in a specific symmetrical arrangement starting from the centre of the awning cover.

collection one

# The most beautiful fabric between heaven and earth.

## Our unique covers help to create a special ambience

The colour and quality of the awning fabric are what help make the ambience on your patio something special. Colour nuances, patterns and textures succeed in creating that uniquely special effect by virtue of their brightness and hue. As a leading manufacturer of high-grade awning fabrics with 50 years of experience in the manufacture of textiles, markilux offers an unparalleled variety. The markilux textile design team is constantly developing new patterns in line with the latest trends, which are nevertheless characterised by their timeless appeal. Among the more than 200 patterns in thematically coordinated colour families, you are bound to find your very own and most beautiful fabric between heaven and earth.

markilux designer awnings have received a multitude of awards:

| Brand

| e.g. markilux perfortex

# Reduced to the essence: Free. Time.

## Premium quality made in Germany.

For over 50 years, markilux has been developing and manufacturing top-quality solar protection solutions. markilux designer awnings are characterised by their first-rate, multi-award-winning design and innovative technology. The production of awning and cover under one roof is the essence of what markilux “Made in Germany” represents, with the aim of making an al fresco lifestyle comfortable, convenient and enjoyable. With markilux, you can turn your favourite spot outdoors into something extra special. **The best under the sun. Create the most alluring shade in the world.**

**markilux quality**  
 The best possible materials and a comprehensive quality management system ensure that every markilux designer awning has a long service life. As a company, markilux is certified in accordance with EN ISO 9001 standards.

**markilux functionality**  
 markilux combines innovative technologies and smart solutions to create high-end products. A multitude of accessories and operating options make it possible to individualise your markilux designer awning in line with your own personal wishes.

**markilux service**

The combination of a brand product with competent advice and professional installation on site makes your solution perfect. Qualified markilux specialist dealers offer a comprehensive service and are the personal contact in your vicinity.

Member of

**Rat für Formgebung**  
German Design Council

**markilux design**

It is the perfect combination of form and function that turns an awning into a markilux designer awning. In this respect, markilux relies on its long-standing experience in R&D and design.

**Self-cleaning effect**  
 Water droplets pick up dirt particles and run off the awning cover taking dirt with them (the awning must be set at a pitch of at least 14°), ensuring you can enjoy your beautiful fabric for a long time to come.

**Bonded awning covers**  
 Panel joints bonded together ultrasonically ensure a consistent, unobtrusive appearance. Their excellent resistance to water, light and fluctuations in temperature ensures that the service life of the cover is extended substantially.

**Light and weather resistance and resistance to fading**  
 High-tech yarns dyed right to the core and the high-grade snc finish developed in house guarantee the most stunning shade in which to relax.

**markilux AR App and Awning Cover Finder**  
 markilux awning fabrics are designed, manufactured and tested in the markilux facility in Germany. Find your own personal favourite amongst the more than 200 cover patterns in the showroom of your markilux specialist dealer, by using the markilux AR App or with the [Awning Cover Finder at markilux.com](http://markilux.com)

markilux

## markilux awning covers. Quality – Made in Germany.

### Functionality can be so beautiful

markilux leaves nothing to chance when it comes to making awning covers. We add a final finishing flourish to the fabric qualities sunvas and specials with a special formula developed in house. This gives these awning covers particularly high longevity and the necessary resistance to dirt and the weather.

markilux awning covers in the sunvas and sunbow ranges offer as a rule the highest possible UV protection for textiles with UPF 50+. This means that your skin's own system of protection is enhanced by a factor of more than 50. This allows you to enjoy sunny days for longer, without putting your health at risk.

Certified in accordance with Oeko-Tex standard 100\*, all markilux awning covers are guaranteed free from harmful dyes and chemicals.

\* sunvas, specials: A696-001 Hohenstein HTTI; sunbow: 63864 OETI

markilux

“Being fully involved, open to new ideas, thinking freely. Making technological advances, consolidating material awareness, fully utilising shape and colour. Treading new ground, creating a vision, making a statement. These are our goals. This is what motivates us.”

Annette Busch | Head of markilux Textile Design

## specials transolair

### Solar protection with a view

The sunvas fabric with special perforation technique stands for impressive transparency as well as good light and air permeability.

We recommend transolair be used in the markilux shadeplus, for lateral wind protection and increased privacy as well as for vertical roller blinds and glass canopy awnings.

This perforated awning cover allows a view of the outdoors while shielding from prying eyes at the same time. It ensures good air circulation between the cover and the glass. This effectively reduces the build-up of a heat cushion between fabric and glass. The creation of water troughs is minimised.

| XL | Fabric patterns of the series 338.. (250 cm fabric width) depending on the model available as widely woven fabric for seamless covers up to a drop of 230 cm.  
Fabric patterns of the series 339.. (120 cm fabric width) are made up with a horizontal seam when used in a shadeplus, as a result, a fabric with a textured or flecked pattern will take on an appearance different from that of the awning cover.

**Solar protection with climate regulation**

This slightly transparent high-tech fabric, whose coating has had particles of aluminium added to it, is particularly effective at reflecting the sun's rays. Improves the climate in the room while still offering a good view outside.

vuscreen ALU is state-of-the-art solar and glare protection for markilux window blinds and shadeplus covers.

### Ideal for conservatories

Gaps in the warp, woven into the fabric, make this perfotex fabric permeable to both air and water. The risk of the formation of water troughs in rain showers and the build-up of excessive heat between cover and glass is reduced. The aluminium coating applied to the series 332.. further reduces solar gain. The weatherproof finish also inhibits the accumulation of dirt and offers excellent water repellency.

The top of the material has been impregnated with a higher percentage of aluminium and should face upwards/outwards to maximise solar reflection. The aluminium in the coating is visible, especially in the case of light cover patterns and under backlit conditions.

Create the most alluring  
shade in the world.

markilux

colour on demand, valance, care and overview

# colour on demand

## Now you set the tone. Unique in Germany. And worldwide.

**1625 good reasons for showing your true colours**  
With the new colour on demand system, markilux gives you the opportunity to choose your very own colour to create your own personal awning heaven.

The basis for this is a plain white fabric in the tried-and-tested markilux sunvas quality, dyed using a state-of-the-art and extremely fade-resistant dyeing process in standard RAL colours. Testing of the material by independent bodies has provided undeniable proof of the excellent technical characteristics of the quality of sunvas fabric.

markilux – the best under the sun.  
Create the most alluring shade in the world.

© RAL Borm 2026

**Awning cover colour to suit your requirements. Incredible. True.**  
You select the colour of your choice from the Original RAL D2 Designer Colour Swatch. The dyeing order is undertaken on the understanding that there will be slight variations in material and production. You can receive a sample beforehand. Your markilux specialist partner would be happy to advise you.

# The valance. For that classic look.

Valance style 1 – straight

Valance style 2 – wavy

Valance style 3 – arced

Valance style 6 – undulating

**A valance is a small decorative piece of fabric suspended from the front profile** It gives your markilux folding-arm awning a classic look and is available in different shapes (depending on the model / optional). A standard matching braid colour has been assigned to each fabric pattern.

The pattern of the valance is always aligned with that of the cover. It is cut from the same piece of material and runs out symmetrically on both sides. In the case of striped fabrics, the valance shape is matched symmetrically to the stripes in the material. We cannot guarantee that the pattern repeat of a valance supplied at a later date will match that of the original cover.

# markilux

Awning covers are industrially manufactured textile products which serve both a functional and a decorative purpose. They are high-tech products that meet strict technical performance criteria. Each production cycle undergoes extensive laboratory tests.

Criteria such as water impermeability, stiffness, dirt and water-repellent properties, resistance to tearing and tear propagation, colour fastness and numerous other characteristics are defined, assessed and guaranteed for each fabric type by the manufacturer.

Although only first-class, quality controlled fabric is used in production, there are limits to the degree of perfection that can be achieved. Small irregularities such as knots, thicker and thinner sections of yarn, isolated yarn breakages as well as certain other idiosyncrasies of awning covers are phenomena that awning owners complain about occasionally, but such characteristics cannot be completely eradicated even with today's technology.

## Creases

Creases can appear during the cover manufacturing process and if the fabric has been folded. A dark line may become visible at the crease when viewed against the light, especially in the case of lighter colours. This is because the fibres have become kinked when the fabric was folded (altered light refraction).

## Waviness (puckering) near the seam and in the middle of a panel

Puckering can appear along the side hems, near the panel joints and in the centre of a panel.

There is a double layer of fabric at the panel joints. As a result, the layers of fabric are forced to assume different diameters when being rolled up. The tension exerted by the folding arms and the weight of the roller tube and/or front profile can exacerbate this effect. Puckering can also develop if a "water trough" forms during heavy rainfall.

## Resistance to rain

Solar protection fabrics are impregnated with a water-repellent finish and, if properly cared for and used at a pitch of at least 14° (to the horizontal), remain impervious to water during short, light rainfall.

During prolonged and/or heavy rainfall the awning must not be extended or should be retracted to prevent damage.

If the cover becomes wet, the awning must be extended again at the earliest opportunity once the rain has stopped to allow the fabric to dry and prevent the build-up of mildew, i.e. marking of the fabric.

## Side hems

In most cases an active tensioning system keeps the cover almost permanently taut. Although seams and hems provide reinforcement, they also have to withstand the most strain.

When the fabric is being rolled up, the seams and hems lie on top of one another which increases the pressure and tension even more. They are therefore exposed to considerable strain and this can cause them to stretch. As a consequence, the side hems may sag slightly during extension and retraction of the the awning.

## How to take proper care of your awning cover

Dust and dirt can best be removed when dry using a soft brush. Remove leaves, twigs and similar debris immediately. Small marks or stains should be removed using water and a commercially accepted, preferably liquid, mild detergent (5% soap solution: water temperature max. 30°). Then, thoroughly rinse the cover off with water.

Detailed instructions for the awning purchaser with all important information regarding operation, care and maintenance are included with every awning delivery.

**Printed is not woven!**  
Before making a final choice of pattern, please be sure to compare the illustration in this fabric brochure with an actual fabric sample in the showroom of your local markilux specialist dealer.

Depending on the model, awning size and pattern, the awning cover will either be seamless or with transverse or longitudinal seams in a specific symmetrical arrangement starting from the centre of the awning cover.

In covers made from striped and printed fabrics, the pattern repeat may not be perfectly matched where the panels have been joined. Depending on the model and size, not all the maximum awning dimensions can be achieved if the cover is made using markilux sunbow.

Patterns with wider pattern repeats are shown on a scale of approximately 1:10. Those with a narrow pattern repeat and plain fabrics are shown in full size (1:1).

The best under the sun. Create the most alluring shade in the world.

Innovative technology and the pinnacle of quality: markilux solar protection solutions have received both acclaim and multiple awards. Made in Germany. Ideas, detailed information, professional advice and all the exquisite markilux awning fabric patterns can be found in your specialist dealer's showroom and at [markilux.com](http://markilux.com)
